OilDoc Conference — Event Program 2025 State: March 2025. Subject to change.

| DAY 1 – TUESDAY, MA | nce – Event Program 202 N 13, 2025 | o state. March 2020. Subject to change. | | |
|---------------------|--|--|---|--|
| 09.00 am — 10.00 am | | Opening: Petra Bots & Rüdiger Krethe (OilDoc) | | |
| | Plenary lecture: The business case Sustainability – Between challenges and opportunities | | | |
| 10:00 am – 10:30 am | Senator Apurva Gosalia I Fokus Zukunft GmbH & Co. KG Coffee & Snacks | | | |
| 10.00 am | Hall 1 | Hall 2 | Hall 3 | |
| 10:30 am - 12:30 am | GREASES & GREASE ANALYSIS | LUBRICANTS – HEALTH & ENVIRONMENT | VARNISH MITIGATION | |
| | Modelling of oil separation from lu- | Lubricants: Update on legal & health | Correlation between lube oil | |
| | bricating greases with the equation of Carman and Kozeny | aspects Dr. Stefan Baumgärtel | condition & bearing temperatures | |
| | Gizem Balkiz Ibishükcü | VSI Verband Schmierstoff-Industrie e.V. | Greg Livingstone Fluitec US | |
| | Carl Bechem GmbH | voi voibana commerciali maacine c.v. | Tiditoo oo | |
| | Element analysis in greases upda- | High-alloyed screws – Chromium-VI | High thermal stress turbine oil speci- | |
| | ted: XRF, RDE-OES or ICP-OES? Raphael Grötsch | formation Rüdiger Schiffer | fications for modern gas turbine | |
| | OELCHECK GmbH | OKS Spezialschmierstoffe GmbH | engines Dr. Ludger Quick FLUITEC | |
| | Criteria based grease analysis | PFAS-free lubricants – new | Special features of high tempera- | |
| | screening and advanced sampling | opportunities considering regulation | ture oxidation – consequences for | |
| | techniques Richard N. Wurzbach MRG Labs | Dr. Eugenia Elzer Setral Chemie GmbH | varnish detection and mitigation | |
| | RICHARU N. WUIZDACH I WIRG LADS | Setrai Chemie Gmbh | Rüdiger Krethe OilDoc GmbH | |
| | Modern Grease analysis in industry | A look at the process chain – what | Improving production of heat | |
| | Wojciech Jewula | comes after metalworking and | transfer fluid systems with solvency | |
| | ECOL Sp. z.o.o. | forming? Focus on cleaning and | enhancers | |
| | | corrosion protection Kerstin Zübert I Hermann Bantleon GmbH | Jo Ameye Fluitec NV | |
| 12:30 am – 02:00 pm | Lunch | Norsum Zubert (Hermann Bandeon Ginbri | Tiulico IVV | |
| 02:00 pm - 03:30 pm | OIL ANALYSIS METHODS | LUBRICANTS & ENVIRONMENTAL ASPECTS | OA MANAGEMENT & DIGITALISATION | |
| | Oxidation revealed: A deep dive into | Biohydraulic oils in stress test – Can | Digitalization in lubrication – | |
| | TOST testing Vincent Bouillon | the "Wet" TOST test provide additional insights? | Future proof standards and concept implementation using state of the | |
| | Eurofins BfB Oil Research S.A. | Carsten Heine OELCHECK GmbH | art technology and Al support | |
| | | | Wojciech Majka | |
| | I also and an area that a few analysts are | On warning advantage Palancian warfen | ECOL Sp. z.o.o. | |
| | Laboratory methods for evaluating the performance and optimization of | On razor's edge: Balancing performance and sustainability for next- | Smart and reliable gearbox monito- ring: Driving digitalization to prevent | |
| | hydraulic oils in industrial equipment | generation hydraulic fluids | major downtime | |
| | Christoph Schneidhofer | Dr. Leon Maser | Andreas Busch | |
| | AC ² T research GmbH | Addinol Lube Oil GmbH | Hydac | |
| | The effect of temperature variation on NIR prediction results | Lubrication in special environments Giuseppe Forastiero | Digital transformation in lubricant monitoring: Data mining and Al rea- | |
| | Dr. Nicolas Rühl | Shell Deutschland Oil GmbH | diness for modern organizations | |
| | Metrohm AG | | Ferenc Pall MOL-LUB Ltd. | |
| 03:30 pm – 04:00 pm | Coffee & Snacks | | | |
| 04.00 pm – 06:00 pm | OIL SENSORS Online monitoring of total water | LUBRICANTS & LUBRICATION Fluid solutions – Innovative and su- | SUSTAINABILITY & ECONOMICS Cost reduction with high perfor- | |
| | contamination in lubricants com- | stainable industrial oil concepts | mance lubricants | |
| | bining NIR moisture sensors and | Wolfgang Bock | Dr. Frank-Olaf Mähling | |
| | optical imaging particle detection | Fuchs Lubricants Germany GmbH | Evonik Operations | |
| | Eneko Gorritxategi Atten2 Oil condition monitoring using multi- | Development of vacuum lubricants | The contribution of lubricant analy- | |
| | functional compact near-infrared | for contamination sensitive environ- | sis to cost efficient and sustainable | |
| | spectroscopic sensor | ments | machine management | |
| | Dr. Kyoko Kojima | Fabian Schüler | Stefan Mitterer | |
| | Hitachi Ltd The impact of oil additives on oil | Materiales GmbH Lubrication challenges and bearing | OELCHECK GmbH Concept and process for cleaning | |
| | electrical conductivity | failures in screw compressors for | oil-contaminated machine con- | |
| | Dr. John K. Duchowski, | hydrogen and methane gas trans- | densate in power plants – a best | |
| | Hydac FluidCareCenter GmbH | port Dr. Maria Valentna Cutvinazki I MOL LUD | practice report | |
| | | Dr. Maria Valentne Sutyinszki I MOL-LUB Impact of the lubricating oil che- | Anna Krein I Optioil GmbH Heat transfer fluid recycling – | |
| | | mistry on the knock sensitivity of a | practical experience | |
| | | gas engine running on hydrogen | Vit Henych | |
| | | Luis Rodriguez | CLASSIC Oil s.r.o. | |
| 6:00 pm – 8:00 pm | COME TOGETHER - ZWICKL RECEPTION | Petro-Canada Lubricants Inc. | | |
| 0.00 pm - 8:00 pm | COME TOGETHER - ZWICKL RECEPTION | <u> </u> | | |

| | Y 14, 2025 | | | |
|--|--|--|--|--|
| | Hall 1 | Hall 2 | Hall 3 | |
| 09:00 – 10:30 am | OIL ANALYSIS METHODS | WIND POWER LUBRICATION | TURBO EQUIPMENT MANAGEMENT | |
| | Oil Condition Monitoring (OCM) with | Assessment of blade bearing | Turbine oil management & handling in | |
| | FTIR spectroscopy – Comparison, | greases performance with water | refineries | |
| | challenges and solutions | contamination and grease mixtures | Michael Grill | |
| | Christoph Schneidhofer | Ulf Rieper | OMV Refining & Marketing GmbH | |
| | AC ² T research GmbH | Shell Deutschland Oil GmbH | | |
| | Comparing new ASTM methods for | Case analysis of wind turbine gear- | Lessons learned for lubricant systems | |
| | FTIR analysis of fluid condition | box lubrication failure | in gas turbines | |
| | David Swanson | Yesid Antinio Gomez | Dr. Bernhard Persigehl | |
| | POLARIS Laboratories | Bureau Veritas Spain, OCM | Experten-Zentrum für Technik | |
| | New infrared absorption method for | Damage prevention in main bearings | Synergistic approaches: Integrating | |
| | field instruments | and gearboxes – Don't give WECs | vibration, oil analysis, and varnish | |
| | Matthias Winkler | (white etching cracks) a chance | analysis for enhanced gas turbine | |
| | CM Technologies GmbH | Stefan Bill | performance and maintenance | |
| | G | Rewitec GmbH | Jorge Alarcon | |
| | | Trowned differ | Bureau Veritas Spain, OCM | |
| 10:30 am - 11:00 am - Coff | Pe & Snacks | 1 | Dureau vertas opairi, ooivi | |
| 11:00 am – 12:30 pm | COOLANTS & ANALYSIS | LUBRICANTS & LUBRICATION | CONTAMINATION CONTROL | |
| 11.00 am 12.00 pm | The shift from conventional to low- | Influence of operating parameters | Defining the right contamination | |
| | conductivity coolants in battery | on the oxidation rate of gear oils in | control strategy | |
| | electric | real operation | Guido Bertels | |
| | Matthias Aßmann | Dr. Lukas Hafner | DES-CASE | |
| | | | DES-CASE | |
| | OELCHECK GmbH Wire corrosion and conductive layer | Evamo Pump Technology Solutions PS GmbH Shear stability and thermal perfor- | Race for clean oil – | |
| | deposits: The development of bench | mance analysis of engine oils for | oil filter efficiency tests | |
| | test technology for electric vehicle | electric vehicles | Steffen D. Nyman | |
| | drivetrains | | C.C. Jensen A.S | |
| | Greg Miiller SAVANT Inc. | Deepak Veeregowda, Ducom Instruments (Europe) B.V. | C.C. Jensen A.S | |
| | Coolant analysis: A key to complete | Optimal lubrication of roller chains | Oil cleanliness: Key element to asset | |
| | asset management | & conveyor chains | reliability | |
| | Emily Featherston | Alexander Frankenstein | Saeed Asiri | |
| | POLARIS Laboratories® | | Sabic | |
| 12:30 pm – 02:00 pm – Lun o | | FB Ketten Handelsgesellschaft mbH | Janic | |
| | | | | |
| | | MWE & CLEANING | OIL ANALYSIS & MANAGEMENT | |
| 02:00 pm – 03:30 pm | OIL SENSORS II | MWF & CLEANING Process element cooling Jubricant — | OIL ANALYSIS & MANAGEMENT Extended oil change intervals | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines | Process element cooling lubricant – | Extended oil change intervals | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation | Process element cooling lubricant – a comparison in performance | Extended oil change intervals Rainer Schöpf | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer | Process element cooling lubricant – a comparison in performance Anna Hillmann | Extended oil change intervals | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH | Extended oil change intervals Rainer Schöpf OELCHECK GmbH | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological perfor- | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field applications of a multiparameter oil | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological performances of water-based coolants | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using data to determine oil analysis testing | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field applications of a multiparameter oil condition sensor | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological performances of water-based coolants and metalworking fluids | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using data to determine oil analysis testing frequency | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field applications of a multiparameter oil condition sensor Jeffery Lubkowski | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological performances of water-based coolants and metalworking fluids Dr. Ameneh Schneider | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using data to determine oil analysis testing frequency Lisa Williams | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field applications of a multiparameter oil condition sensor Jeffery Lubkowski Poseidon Systems LLC, U.S. | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological performances of water-based coolants and metalworking fluids Dr. Ameneh Schneider Optimol Instruments Prüftechnik GmbH | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using data to determine oil analysis testing frequency Lisa Williams Spectro Scientific Ametek | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field applications of a multiparameter oil condition sensor Jeffery Lubkowski Poseidon Systems LLC, U.S. Value proposition & interplay of inline | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological performances of water-based coolants and metalworking fluids Dr. Ameneh Schneider Optimol Instruments Prüftechnik GmbH Monitoring and maintenance of | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using data to determine oil analysis testing frequency Lisa Williams Spectro Scientific Ametek Case study of oil condition monitoring | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field applications of a multiparameter oil condition sensor Jeffery Lubkowski Poseidon Systems LLC, U.S. Value proposition & interplay of inline versus lab analysis | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological performances of water-based coolants and metalworking fluids Dr. Ameneh Schneider Optimol Instruments Prüftechnik GmbH Monitoring and maintenance of working fluids using specialized | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using data to determine oil analysis testing frequency Lisa Williams Spectro Scientific Ametek Case study of oil condition monitoring – A practical and effective software | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field applications of a multiparameter oil condition sensor Jeffery Lubkowski Poseidon Systems LLC, U.S. Value proposition & interplay of inline | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological performances of water-based coolants and metalworking fluids Dr. Ameneh Schneider Optimol Instruments Prüftechnik GmbH Monitoring and maintenance of working fluids using specialized devices: Practical experiences | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using data to determine oil analysis testing frequency Lisa Williams Spectro Scientific Ametek Case study of oil condition monitoring – A practical and effective software solution for everything from planning | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field applications of a multiparameter oil condition sensor Jeffery Lubkowski Poseidon Systems LLC, U.S. Value proposition & interplay of inline versus lab analysis | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological performances of water-based coolants and metalworking fluids Dr. Ameneh Schneider Optimol Instruments Prüftechnik GmbH Monitoring and maintenance of working fluids using specialized devices: Practical experiences Peter Sebok | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using data to determine oil analysis testing frequency Lisa Williams Spectro Scientific Ametek Case study of oil condition monitoring – A practical and effective software solution for everything from planning sampling to managing corrective | |
| | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field applications of a multiparameter oil condition sensor Jeffery Lubkowski Poseidon Systems LLC, U.S. Value proposition & interplay of inline versus lab analysis | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological performances of water-based coolants and metalworking fluids Dr. Ameneh Schneider Optimol Instruments Prüftechnik GmbH Monitoring and maintenance of working fluids using specialized devices: Practical experiences | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using data to determine oil analysis testing frequency Lisa Williams Spectro Scientific Ametek Case study of oil condition monitoring – A practical and effective software solution for everything from planning sampling to managing corrective actions | |
| 02:00 pm — 03:30 pm | OIL SENSORS II Inline viscosity sensors - Guidelines for successful implementation Dr. Alexander O. Niedermayer Micro Resonant Technologies GmbH Asset health insights from In field applications of a multiparameter oil condition sensor Jeffery Lubkowski Poseidon Systems LLC, U.S. Value proposition & interplay of inline versus lab analysis Dr. Carsten Giebeler I Spectrolytic GmbH | Process element cooling lubricant – a comparison in performance Anna Hillmann Hermann Bantleon GmbH Ranking of tribological performances of water-based coolants and metalworking fluids Dr. Ameneh Schneider Optimol Instruments Prüftechnik GmbH Monitoring and maintenance of working fluids using specialized devices: Practical experiences Peter Sebok | Extended oil change intervals Rainer Schöpf OELCHECK GmbH Condition-based oil sampling – Using data to determine oil analysis testing frequency Lisa Williams Spectro Scientific Ametek Case study of oil condition monitoring – A practical and effective software solution for everything from planning sampling to managing corrective | |

DAY 3 - THURSDAY, MAY 15, 2025

It's up to you!

You have the choice between different workshops in Rosenheim or Brannenburg and an excursion via cog railway. IMPORTANT: You have to pre-register for the program (and bus-shuttle when needed) in our event app!

✓ Take part in a practical oriented workshops at the OilDoc Academy in Brannenburg and visit the OELCHECK laboratory (15 km from Rosenheim, Bus-Shuttle leaves KU'KO at 8:45 am (pre-register!)

| WORKSHOP / LAB TOUR AT THE OILDOC ACADEMY IN BRANNENBURG (15 KM FROM ROSENHEIM) | | | | |
|---|---|--------------------------|--|--|
| 9:30 am - 11:00 am | WORKSHOP A - I | OELCHECK LAB-TOUR I | | |
| | Schöpfen Sie das Potential von Schmier- und Betriebsstoffanalysen voll aus – So legen Sie sinnvolle Testumfänge fest (in German) Dr. Andrea Schreiner & Matthias Aßmann OELCHECK GmbH | Test methods in practice | | |
| 11:00 am - 11:30 am | Coffee & Snacks | | | |
| 11:30 am - 1:00 pm | | OELCHECK LAB-TOUR II | | |
| | Unlocking the full potential of fluid analyses – Defining test scope and utilisation of additional tests (in English) Dr. Andrea Schreiner & Matthias Aßmann OELCHECK GmbH | Test methods in practice | | |
| 1:00 pm - 01:30 pm | GRAB & GO LUNCH | | | |

0R

Take part in a practical oriented workshop (presented & organized by Fluitec) at the KU'KO Rosenheim

| WORKSHOP AT THE KU'KO ROSENHEIM - PRESENTED BY FLUITEC | | | | |
|--|--|--|--|--|
| 9:00 am - 10:30 am | Hall 1 | | | |
| | Optimizing lubricant programs for rotating equipment Part I Jo Ameye, FLUITEC Rüdiger Krethe, OilDoc GmbH Sanya Mathura, Strategic Reliability Solutions Elona Rista, Solar Turbines | | | |
| 10:30 am - 11:00 am | Coffee & Snacks | | | |
| 11:00 am - 12:30 pm | Optimizing lubricant programs for rotating equipment Part II Jo Ameye, FLUITEC Dr. Ludger Quick, previously Siemens Energy Greg Livingstone, FLUITEC | | | |
| 12:30 pm - 01:30 pm | GRAB & GO LUNCH | | | |
| | | | | |

More details on this special workshop will be published soon!

0R

✓ **Excursion:** Cog railway tour to the top of the Wendelstein (1,723 m above sealevel) incl. technical information on the traditional cog railway, "White Sausage Express" & easy hiking the Summit & Panoramic Trail (optional)

Otto von Steinbeis achieved a pioneering engineering masterpiece with the construction of an electric cog railway on the Wendelstein between 1910 and 1912. The journey up to the Wendelstein is an unforgettable experience in itself as it passes through lush flowering alpine meadows, shady forests and over jagged cliffs!

Meeting point: 9:30 am at Brannenburg valley station, Bus-Shuttle leaves KU'KO at 8:45 am (pre-register!) ending at 1:30 pm at Brannenburg valley station

MEET OUR EXHIBITORS!

Supporters

Don't miss the OilDoc Conference & Exhibition in the Bavarian Spring Season!

Until March 31, 2025 you register at the Early Bird Rate! Early Bird Rate: 899 € + VAT

(Regular Rate: 995 € + VAT)

No visit without the OilDoc Conference App! Inform, plan, contact, ask questions

Make sure to login our OilDoc Conference App for the full event experience! The OilDoc conference app can be used with a smartphone, tablet, laptop or PC.

Online at: eventmobi.com/oildoc

Location

KUKO, Conference Center (www.kuko.de), Kufsteiner Strasse 4 D-83022 Rosenheim (inner city) 50 km from Munich, 70 km from Salzburg

Rosenheim is a central spot on the way between Munich and Salzburg and has a lot to offer. You will enjoy your stage in one of the most beautiful towns of Bavaria.
